Progress report of pilot sites in Vietnam

Nguyen Van Long & Vo Tran Tuan Linh
Institute of Oceanography, VAST
• 2 sites: Nha Trang Bay and Phu Quoc islands.
Parameters monitored

- Benthic covers: Living and non-living substrata
- Reef fishes: Reefcheck and local indicators.
- Macro-invertebrates: Reefcheck indicators.
- Coral recruitment: Abundance and size in Nha Trang Bay from 2016.
Challenges and potentials moving forward

- Lack of funding for OA.
- Limitation in taxonomy.
- Potentials for ARMS, CAU and BMU deployment and recovery in combining with other activities: only Nha Trang Bay?
Thank you !
